

Possible Points	Activity	Points Earned

### Terminology

Following is a partial list of terms related to webmastering. You will likely find other words to include in your list, but this is a good start.

hardware	software	log-in	directory	applet
multimedia	HTML	URL	HTTP	cursor
Boolean	upload	download	Java	network
database	query	email	field	FTP
CSS	modem	CPU	operating system	domain name

### Tutorial Topics

We offer a listing of topics to consider tutorials for, but it is by no means an exhaustive list. You will encounter other topics as you progress through your study. To find a tutorial on any subject, go to your favorite search engine and type the following into the search box: "your topic" + tutorial. You should be able to find free online tutorials on most every subject. Check the links we provide for more tutorials. If you have trouble finding free ones, you may want to add "+ free" to your search parameters.

website design	text layout	images	hyperlinks
tables	frames	forms	text commands
meta tags	adding sound	javascript	CSS
CGI	webmastering	getting started	Java
writing applets	XML	AJAX	Web 2.0
php	Java/JSP	TomCat	Flash
LAMP (Linux, Apache, MySQL, php)			

### Personal Website

Your personal website should include as many of the following as possible. You may not necessarily be interested in keeping all of these things on your website, but it's a good idea to know how to make each of the items function properly. Don't forget that you need to be sure that your website works in a variety of browsers.
